

AirTamer™

TRAVEL AIR PURIFIER

STATE-OF-THE-ART ELECTROSTATIC PURIFICATION

The AirTamer™ emits a constant stream of healthy negative ions that force airborne pollutants (e.g. viruses, bacteria, pollen, dust, etc.) away from the user's personal space giving the user a zone of cleaner, healthier air to breathe – everywhere they go!

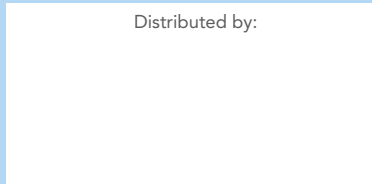

Q: What are negative ions? Are they good for you?

A: Negative ions (air molecules with extra electrons) are electrically charged particles in the air that remove airborne contaminants and have been shown to have a rejuvenating effect upon our bodies. The best natural generator of negative ions is lightning, followed by ocean surf, waterfalls, mountains and forests. In clean, natural air, you'll find the highest concentrations of negative ions. In polluted cities and confined spaces, like offices, you'll find the highest concentrations of unhealthy positive ions.

AirTamer™

TRAVEL AIR PURIFIER

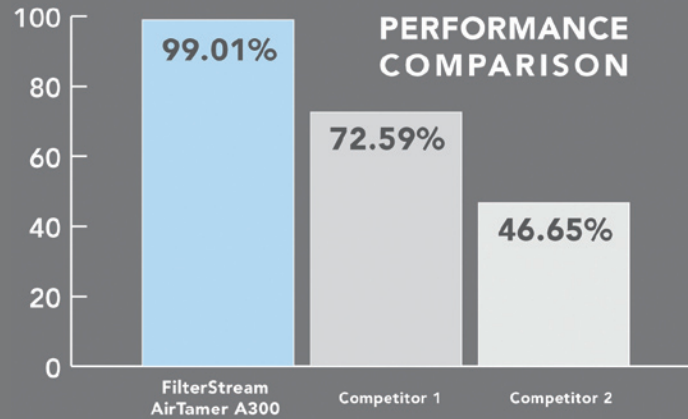

Cleaner,
Healthier Air
Everywhere You Go

AirTamer™

TRAVEL AIR PURIFIER

WORLD'S MOST EFFECTIVE
TRAVEL AIR PURIFIER
FILTERS UP TO **110%**
MORE AIR POLLUTANTS
THAN COMPETITIVE
PURIFIERS.

FEATURES

State-of-the-art electrostatic purification

Creates a 1 meter sphere of cleaner, healthier air around the user.

Cleans the air of atomic sized pollutants

(e.g. Viruses) that traditional air purifiers (e.g. HEPA air purifiers) leave behind.

Ultra Compact

No larger than a pager!

Discreet & Versatile Design

- Allows unit to be worn around one's neck (strap included),
- clipped to a shirt (with built-in clip),
- or placed on a nightstand.

No filters to replace or clean

Healthy negative ions do the filtering.

Silent Operation

No noisy fans or motors.

Extremely energy efficient

Provides 20 days of continuous use (up to 12 times more than competitive models) with one included lithium coin cell battery.

Tri-Vortex™ treated

Advanced technology that offers additional benefits to the user, (see www.trivortex.co.za). No other personal air purifier can offer the amazing combination of Tri-Vortex™ treatment and air purification.

Air Cleaning Facts

Airplane cabin air is often unhealthy

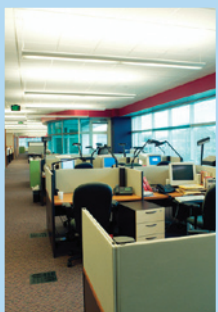

- 1.5 billion people travel on airplanes every year.
- The quality of airplane cabin air is not regulated and has come under intense criticism due to the high occurrence of illness among passengers.
- 84% of airlines recirculate cabin air, leading to sub standard air for breathing purposes. (And a causative factor of travel sickness).

Airborne viruses are common & costly

- The highly contagious common flu affects most of the population every year.
- Healthcare practitioners are especially vulnerable to airborne diseases in crowded facilities.

Commercial building air quality is low

- 40% of all buildings pose a serious health hazard due to indoor air pollution. [Source: World Health Organization]
- Employers and landlords are not doing anything to improve this situation.

Allergies on the rise

- 38% of the population has allergies and this number is growing as air quality erodes inside and outside the home.
