

# Tri-Vortex™

**WATER DISC**

**For healthy and  
better tasting water  
and drinks.**

## What is a Tri-Vortex™ Disc?

This Tri-Vortex™ stainless steel Water Disc has been treated in a unique Tri-Vortex™ chamber for over 24hrs. The treatment process is totally safe - mimicking nature's powerful and logical rhythms. The subtle energy fields on the Tri-Vortex treated Water Disc creates structure in any liquid **within a few minutes.**

## Using the Tri-Vortex™ Water Disc

- **Treat your drinking water** by placing the glass/jug on your Water Disc for approx 3-5 minutes - or leave the Disc permanently in you water dispenser. The Water Disc will improve taste, smell and texture of wine, juices, dairy and most liquids.

### **Please Note:**

Your drinking water should at least be filtered - chlorinated tap water has proven ill effects on the body.

- The disc can safely be used for treating of water for pets and other animals.
- For best results, the disc should be used in conjunction with proper **hydration** - ask your supplier for details on recommended water and salt intake.

## The Tri-Vortex™ Taste Test

**Make sure that liquid to be tasted is kept at least 4 meters away from the Tri-Vortex™ Disc before testing begins.**

- Pour a 1/4 glass of tap water, fruit juice, red wine or coffee.
- Pour a second 1/4 glass of tap water, fruit juice, red wine or coffee and place this glass on the Water Disc for 3 minutes.
- Remove Water Disc from the room or take the treated second glass away from the Disc and place next to the first untreated glass.
- Smell and taste the differences between the treated and untreated liquid.

**The treated liquid will have a smoother taste and less "after-bite" than the untreated liquid. The changes in smell and taste are and indicator that the Disc is charged and working.**
